

## **50501 Movement: A National Call for Justice, Integrity, and Accountability**

### **For Immediate Release**

The 50501 Movement is a coalition demanding justice, transparency, accountability, and an end to executive overreach. Despite being seen as leaderless, every individual, state, city, grassroots organization, and activist are leaders in this movement. Together, they guide us toward a future based on foundational principles. On February 5<sup>th</sup> we help mobilize over 20,000 like-minded individuals, activists, and organizations to stand against the harmful impacts of the current administration and Project 2025.

In truth, the 50501 Movement does not refer to an organization—it represents a vision, the American Dream, as we were all once taught to believe it. Each voice of this movement, peacefully united, forms a rallying cry and demand for the "American Dream" that we once all held close to our heart. A dream that we feel has prove

This is not just a movement—it is our modern-day civil rights struggle.

**"We believe in Liberty, Justice, and the Pursuit of Happiness—not only for ourselves but for all individuals who reside in the United States. We do not believe that the current administration is embodying the ideals that we continue to fight for to make our nation great. Let us be clear: We did not elect Elon Musk. He is not our President."**

— Glo, Pol Rev & 50501 Movement

We refuse to accept that money should hold the power to undermine the fundamental rights we cherish as Americans. We witness, with growing alarm, how our constitutional rights are trampled upon, how the authority of the President is being usurped by those who seek to consolidate power for personal gain. Meanwhile, President Trump systematically dismantles the very guardrails designed to ensure accountability across the branches of government.

We see elected officials shrinking from their responsibility to speak out, paralyzed by fear of losing their political opportunities. But amidst this, we are witnessing an unprecedented wave of unity. People from every background and every corner of this nation are coming together to demand accountability and to push back against the erosion of our rights.

**"On Monday, we call on organizations and activists across the nation to once again stand united. We will not cede ground to fascism quietly. We will fight back against**

**Project 2025 and we will fight for the future of all of our beautiful communities. We not only owe it to our future leaders, ourselves, but to the activists and people who came before us— This is our moment, and the assignment is clear. "**

**— Sarah, 50501 Movement & Voices of Florida**

We stand firm at a critical moment in history, demanding that the American people be heard and that the White House be governed by the true will of the people—not by a tech billionaire who seeks to buy influence and control.

Together with our partners—**Political Revolution, Voices of Florida, No Voices Unheard, Build The Resistance**—we are ready to hold the line. Community is our resistance, community is our strength, and peaceful protest will be one of the ways we will ensure we protect it.
